

The Propane-Powered Farm

Propane can fuel the demands of today's high performance farm while also conserving energy and saving money.

Fun Fact:
Hot air balloons
are propane-
powered too.

New propane-
powered units
distribute precise
heat, drying grain
evenly and making it
extremely efficient.

Propane-powered
light-duty trucks are a
fuel option that lower
operating costs.

New propane-
powered engines are
more efficient and
provide farmers an
immediate savings in
fuel costs.

Propane-powered
flame weed control is
an environmentally
friendly alternative to
herbicides and is
growing in popularity.

The size and location
of propane tanks
will vary depending
on the needs of
the building.

Farmers are using
propane-power for
building and water
heaters.
