

Upgrade To Propane Energy

EARN UP TO \$1,500 PER HOME

Help Prove the Benefits of Propane and Get Up to \$1,500 per Home

Propane is a home energy upgrade that gives your customers superior comfort and lower energy costs compared with all-electric homes. That's why, for builders and remodelers alike, adding propane performance is a significant competitive advantage. Plus, you can earn up to \$1,500 per home, for as many homes as you build or remodel, when you add propane appliances. It's a win-win for you and your customers, and this is how it works.

2022 PROPANE CONSTRUCTION INCENTIVE PROGRAM

The Propane Education & Research Council will pay you up to \$1,000 for each new home or remodel completed in 2022, if you include qualifying propane appliances. You can also earn a \$500 bonus for installing propane appliances specified for your region. That's \$1,500 per home. Funding is limited, and certain restrictions apply, so get your application in as soon as possible by following these steps.

WHO CAN APPLY

In addition to meeting the baseline propane installation requirements, you must also meet the following criteria¹:

- You are a U.S. builder or remodeler, and at least 18 years of age.
- The homes for which you are applying were built or remodeled in December 2021, and/or January through December 2022. Incentive funding is limited, so the sooner you submit your application, the better.

HOW TO APPLY

Visit Propane.com/ConstructionIncentive to learn more, determine if you qualify, apply, or reserve your incentive for a project not yet completed. As a part of the application process, you must also submit a home energy analysis from the Energy Planning Analysis Tool (EPAT) for each project in order to qualify. The EPAT is an easy to use, online tool that calculates potential energy use and modeled emissions data about your homes, which must be included with your application.

HOW IT WORKS

Qualifying and selected construction professionals receive a monetary incentive² for building or remodeling homes using propane appliances. To be eligible, a home must include at least one of the following propane appliances: a boiler or furnace; hydronic air handler; combi boiler; tankless or storage tank water heater; a hybrid heat pump with propane gas emergency heat.

Verification of installed appliances should be provided by a completed gas check, or similar form, performed by a propane supplier.

1. Other conditions may apply. PERC has the right to deny an application even if all eligibility requirements are met.

2. Program will pay participants upon receiving a completed contract, W9, EPAT, and Gas Check. Applicants will receive a 1099 for tax purposes.

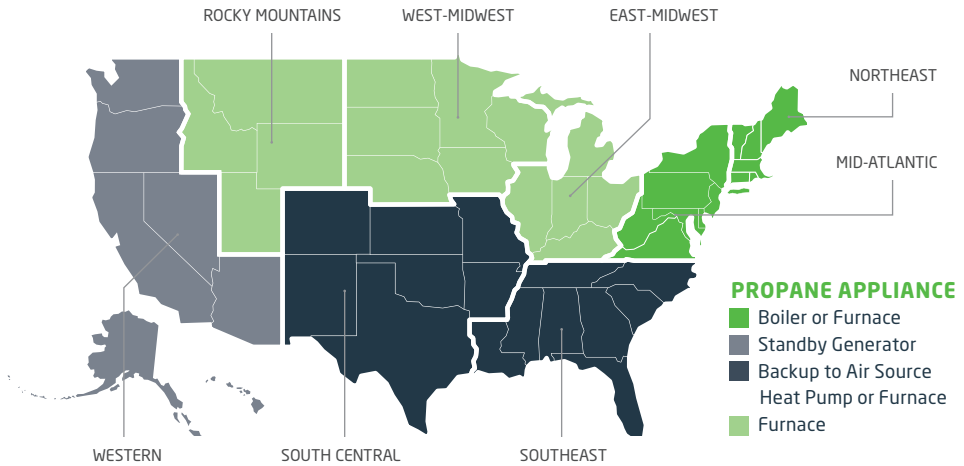

EARN UP TO \$1,000 IN INCENTIVES

PROPANE APPLICATION	INCENTIVE
At least one of these applications is required	
Boiler, Furnace, Hydronic Air Handler, or Combi Boiler (not a heat pump)	\$500
Water Heater (tankless or storage tank)	\$300
Hybrid Heat Pump with Propane Gas Emergency Heat	\$300
Additional propane applications	
Cooktop or Range, Clothes Dryer, Standby Generator, Fireplace or Gas Log Set, Propane Gas Piping for Outdoor Equipment (must comply with all codes)	\$100 Per Appliance

Note: Equipment must be purchased new.

EARN A \$500 REGIONAL BONUS

No matter where in the country you're building, you can earn an extra \$500 on top of the baseline incentive. Find your region below to see what propane appliance you can install to qualify. It puts more money in your pocket, and it will give your home buyer premium performance.

EXAMPLES

There are many qualifying combinations for the incentive. Here are a couple examples of eligible projects.

PROJECT 1 (\$1,000)

BASE INCENTIVE:

- Tankless Water Heater
- Hybrid Heat Pump
- Cooking Range
- Clothes Dryer
- Fireplace
- Standby Generator

PROJECT 2 (\$1,500)

BASE INCENTIVE PLUS NORTHEAST REGIONAL BONUS:

- Storage Tank Water Heater
- Boiler (Regional Bonus Qualifier)
- Cooking Range
- Piping For Propane Outdoor Appliances

For questions regarding specific scenarios or what qualifies, call PERC at 202-452-8975 or email constructionincentive@propane.com.

Propane Appliances

High-efficiency propane gas appliances boost performance and help homeowners lower their energy costs. When multiple propane appliances are combined for maximum efficiency, it can earn builders or remodelers up to \$1,500 per home.

SPACE HEATING

Cost-efficient heating with a more comfortable and consistent warmth.

WATER HEATING

Faster hot water with up to 50 percent cost savings compared with electric options.

COOKING

The joy and control of cooking with gas just like the professionals.

CLOTHES DRYING

Faster drying, easier on clothes, and up to 20 percent reduced energy use.

FIREPLACES

Greater heating capacity and energy efficiency than electric or wood fireplaces, with zero cleanup.

STANDBY GENERATOR

Backup power that's always ready, because unlike gasoline or diesel, propane never degrades.
